

BABYZEN™

The Stroller. Reinvented

BABYZEN™ introduces the ZEN, the most innovative and versatile stroller ever developed.

The ZEN is a unique combination of spectacular functionality and head-turning design.

With its incredible flat-fold system, its solar-powered LED headlight, and its unmistakable profile, the ZEN ensures

an unbelievable strolling experience for your baby and you.

The ZEN is complemented by the YOGA, the exclusive all-in-one carrycot by **BABYZEN™**.

The ZEN and the YOGA are set to become a new standard in luxury infant-to-toddler combinations.

Purposeful Imagination

The ZEN is the result of meticulous design, exhaustive testing, and inspired engineering.

Created from a blank sheet of paper, the ZEN was born from the observation that much too often, strollers are impractical and frustrating (bulky, impossible to fold while holding a child, counterintuitive, heavy - in a word, not suited to the way parents live today), and the strong belief that these limitations should belong to the past.

This is why the ZEN is not just an improvement over existing models. It is a concept like no other.

And because a stroller has many configurations and usages, at BABYZEN™ we gave particular care to every detail of the ZEN, with no compromise on practicality, simplicity, or safety.

The ZEN is made of the best-quality materials, and was developed in partnership with DuPont, the world leader in performance plastics.

The ZEN has been recognized with international awards, including the prestigious Innovation Award at the 2010 Kind & Jugend fair.

5"

Innovation & Performance

Single-Handed Folding and Unfolding

Using just one hand, the ZEN folds and unfolds completely in just 5 seconds. No need to remove the seat, the canopy, or the wheels! It's easy, fun, and safe.

Amazing Flat-Fold

The ZEN is twice as compact as any other stroller in its category. It folds into a package only 25 cm (10 in.) thick, and fits easily in the smallest car trunks.

Lightness and Mobility

The ZEN is one of the lightest strollers in its category (only 10 kg, or 22 lb), but you will hardly need to carry it anyway: it stands upright when folded, which makes it easy to roll on its back wheels.

Warning Light

The solar-powered LED warning light improves the child's safety when crossing the streets, and adds a distinct look to the ZEN.

Operated from the handlebar, it can also be switched to the headlight position in dark areas.

Soft Driving

No need to lock the front swivel wheel when going off-road: the ZEN includes an exclusive anti-wobble system that automatically adapts to uneven terrain, ensuring a smooth ride in every situation.

YOGA. The first **all-in-one** carrycot

The YOGA is the perfect companion to the ZEN, turning it into a travel system usable for newborns, infants, and toddlers.

Designed in the same spirit as the ZEN, the YOGA is also full of smart features. It is the only carrycot that combines so many different usages into one product:

Stroller bassinet

Click in the YOGA, and the ZEN instantly takes on the graceful look of a luxury carriage.

Stroller seat

When the baby wakes up, it takes only a few zips to reconfigure the bassinet into a cozy seat, facing the mother.

Baby bouncer

Take the seat off the stroller and deploy the legs: the YOGA converts into a baby bouncer, usable until the age of one. No need to buy another accessory.

Baby rocker

As a bouncer, the YOGA is equipped with a soft suspension axle.

Travel crib

On its legs, with its bottom flat, the YOGA can also be used as a Moses basket. No need to take the sleeping newborn out of the stroller when you get home!

... and of course, **the YOGA is incredibly foldable**. It collapses into a laptop-size case for easy storage.
